Verizon Data Services India Pvt.Ltd Software Engineer	04/07/2016 - 30/12/2018

PROJECTS

Saviynt- Request Module

10 months

Saviynt is a leading platform for cloud built identity and access governance.

My responsibilities during my tenure at Saviynt included the following:-

- * Revamped the user interface as per customer requirements while aligning with Web accessibility standards.
- * Integrated the existing codebase with Unit testing framework using Jest and React Testing Library.
- * Incorporated Linting in the existing codebase to increase code quality and reduce coding style issues that helps the new team members onboard easily which in turn increases productivity.

Marketo

3 months

Marketo is a digital marketing product owned by Adobe. My roles and responsibilities in the project include, but are not limited to the following.

- * Migrate existing JavaScript class based React components to Typescript function based Adobe components in order to match global web accessibility standards.
- * Collaborate with UX and PMO team to understand the business requirements for improving web accessibility in the application.

ProQuest

45 months

ProQuest is an enterprise application that caters to Verizon Enterprise Service Customers(VES).The application is built on the concepts of Object Oriented JavaScript.My roles in this project included, but were not limited to, the following:-

- * Implementing new features to enhance the performance of the application based on JavaScript's ES6 features.
- * Working on SQL's DDL and DML commands along with Javascript to provide a responsive web application to the customer.

Personal projects

- * Developed a basic voice assistant web application using JavaScript, Speech recognition API, HTML and CSS.
 - * Developed a task organizer application using React, Bootstrap and deployed on Firebase.
 - * Created a dashboard to display project details with live notification system using React, Redux and Google's Firebase
