PROJECTS

ProQuest

45 months

ProQuest is an enterprise application that caters to Verizon Enterprise Service Customers(VES).The application is built on the concepts of Object Oriented JavaScript.My roles in this project include, but are not limited to, the following:-

- * Introducing and implementing new strategies to improve customer's user experience.
- * Implementing new features to enhance the performance of the application based on JavaScript's ES6 features.
- * Working on SQL's DDL and DML commands along with Javascript to provide a responsive web application to the customer.
- * Revamping user interfaces based on customer feedback.

Personal projects

- * Recreated the popular Tic-tac-toe game using basic React.
- * Developed a room based chat application using Socket.io, Node.js, Express and React.js.
- * Developed an exercise tracker using MongoDB,Express,React and Node.js.
- * Implemented graphs using Chart.js libraries in React application.
- * Created a dashboard to display project details with live notification system using React, Redux and Google's Firebase
- * Integrated Webpack, Babel with React from scratch.
- * Created multiple mini projects using Javascript, HTML, and CSS to create responsive web apps.
