SAI LAKSHMY

+971 505168746 | sailakshmy94@gmail.com | Dubai

Summary

Senior React Developer with over 7 years of front-end development experience, specializing in ReactJS and JavaScript.
- Skilled in creating interactive web interfaces and expanding into React Native.
- Known for effective testing using React Testing Library and Jest, and strong leadership in Agile teams.
- Current role at Synechron focuses on innovative web app development, UI revamps, codebase integration with testing frameworks, and performance enhancements.
- Proficient in JavaScript and ReactJS and exploring React Native and NextJS for mobile development and server-side rendering.
- Committed to clean, maintainable code, timely delivery, and collaborative work in cross-functional settings.

Skills

JavaScript, ReactJS, React Native, TypeScript, HTML, CSS, React Testing Library, Jest, React Hooks, Redux, Redux Saga, Redux Thunk, Redux Toolkit, NextJS, GraphQL, Git, GitHub, GitLab, Agile, Kanban, Google Analytics, Firebase

Education

Sathyabama University
Electronics & Telecommunications | 04/2016

Experience

Synechron Dubai | Dubai
Lead React Developer | 09/2023 - Present

- Serving as a key contributor with expertise in React JS, to drive the implementation of efficient and scalable components for web applications.
- Extending proficiency to React Native, facilitating the development of cross- platform mobile applications with a shared codebase.
- Designing GraphQL calls using React to streamline user interface performance.
- Maintaining high-level expertise in React state management strategies.
- Collaborating closely with design teams to translate UI/UX designs into code, ensuring a visually appealing representation of the intended user experience.
- Implementing robust unit testing practices to ensure the reliability and stability of code, which helps in contributing to the overall quality of the application.
- Engaging in quality assurance processes to identify and address potential issues early in the development lifecycle.

Saviynt Bengaluru | Bengaluru
Software Engineer 3 | 09/2021 - 09/2023

- Developed, tested, and maintained software applications, ensuring they meet quality standards. • Worked on both front-end and back-end components of the software.
- Maintained existing software systems by identifying and correcting software defects.
- Provided guidance and mentored less-experienced staff members.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability, and performance.

GlobalLogic Bengaluru | Bengaluru
Senior Software Engineer | 11/2020 - 09/2021

Infosys Chennai | Chennai
Technology Analyst | 07/2019 - 11/2020

Infosys | Chennai
Software Engineer | 12/2018 - 06/2019

Verizon Data Services India Pvt. Ltd | Chennai

Software Engineer | 07/2016 - 12/2018

Projects

Emirates Integrated Telecommunications Company (PJSC)- Digital Factory

EITC, is a telecommunications company based in the United Arab Emirates, providing a range of mobile, fixed-line, internet, and digital services to customers.

- Serving as a key contributor with expertise in React JS, driving the implementation of efficient and scalable components for web applications.
- Extending proficiency to React Native, facilitating the development of cross-platform mobile applications with a shared codebase.
- Implementing robust unit testing practices to ensure the reliability and stability of code, contributing to the overall quality of the software.
- Collaborating effectively with backend developers, designers, and other stakeholders to ensure a seamless integration of frontend and backend components, contributing to the overall success of the development projects.

Saviynt- Request Module

Saviynt is a product that specializes in Identity Governance and Administration (IGA) solutions, providing cloud-based services for managing access, identity, and compliance in enterprise environments.

- Revamped user interfaces to meet customer requirements and align with web accessibility standards, ensuring enhanced user experience.
- Integrated codebase with Jest and React Testing Library for unit testing, streamlined testing processes, and improved code quality.
- Implemented linting practices to enhance code quality and facilitate the onboarding of new team members, fostering a collaborative work environment.

Marketo

Marketo is a marketing automation platform, owned by Adobe, that provides software solutions for marketing and sales teams to streamline and automate various aspects of their campaigns, lead management, and customer engagement.

- Migrated JavaScript class-based React components to Typescript function-based Adobe components to improve web accessibility, enhancing user experience.
- Collaborated with UX and PMO teams to understand business requirements and enhance web accessibility, showcasing strong communication skills

ProQuest

ProQuest is an enterprise application that serves Verizon Enterprise Service Customers (VES), handling PreSales data, price calculation, and contract creation for enterprises.

- Implemented new features to enhance application performance using JavaScript's ES6 features, contributing to overall project success.
- Worked on SQL's DDL and DML commands to provide a responsive web application to customers, ensuring seamless user experience
